Gilead Sciences Denmark	Informationsmateriale til patienter og pårørende	Aarhus University Hospital, Dep of Infectious Diseases	Sponsorship	Publication of the booklet "At leve med HIV", which is a book that is distributed via HIV clinics in Denmark to all people living with HIV and their relatives. The book has previously been published 4 times, - most recently in 2016. Since then, a number of changes have taken place, and the outpatient clinics no longer have copies available to hand	6 months Expected Project Start: 01.10.2023	30 606.66 DKK (excl. VAT)	N/A

				out to the patients. Therefore, it is considered that it is time to publish the book again with updated and new knowledge.			
	A Barriers to retention in HIV care and strategies for re-engagement	Rigshospitalet, Department of Infectious Diseases	Fellowship Programme 2023	This study will give information about medical and demographic risk factors for non-retention in care, barriers to retention in care and strategies for re-engagement in care. Study population is the 1900 patients at Rigshospitalet	1 Dec 2023 – 30 Nov 2024	276 000 DKK (excl. VAT)	N/A
	Self-testing at home - screening for hepatitis c virus among high-risk groups	Copenhagen University Hospital	Fellowship Programme 2023	The aim is to study the efficacy of testing and referral to treatment for hepatitis C virus (HCV) by offering people who inject drugs (PWID) to perform HCV self-testing.	1 July 2023 – 1 July 2024	337 168 DKK (excl. VAT)	N/A

	<p>Follicular Lymphoma – a model disease for patient trajectories, impact of treatment sequence, and patient preferences in chronic cancers</p>	<p>Aarhus University Hospital, Dept. of Hematology</p>	<p>Fellowship Programme 2023</p>	<p>Follicular lymphoma is the most common subtype of indolent lymphoma in the Western world. The disease necessitates multiple lines of therapy, where not one therapy has been shown to be superior to other therapies when it comes to improving overall survival. 20 % of patients will have early relapse or high-risk transformation. . Early identification of high-risk patients is critical, as these patients now have alternatives to chemotherapy, e.g. novel bispecific antibodies and cellular therapies.</p>	<p>1 Sep 2024 – 31 Aug. 2027</p>	<p>490 000 DKK (excl. VAT)</p>	<p>N/A</p>
